

## Social Proof Section Design (20 Marks)

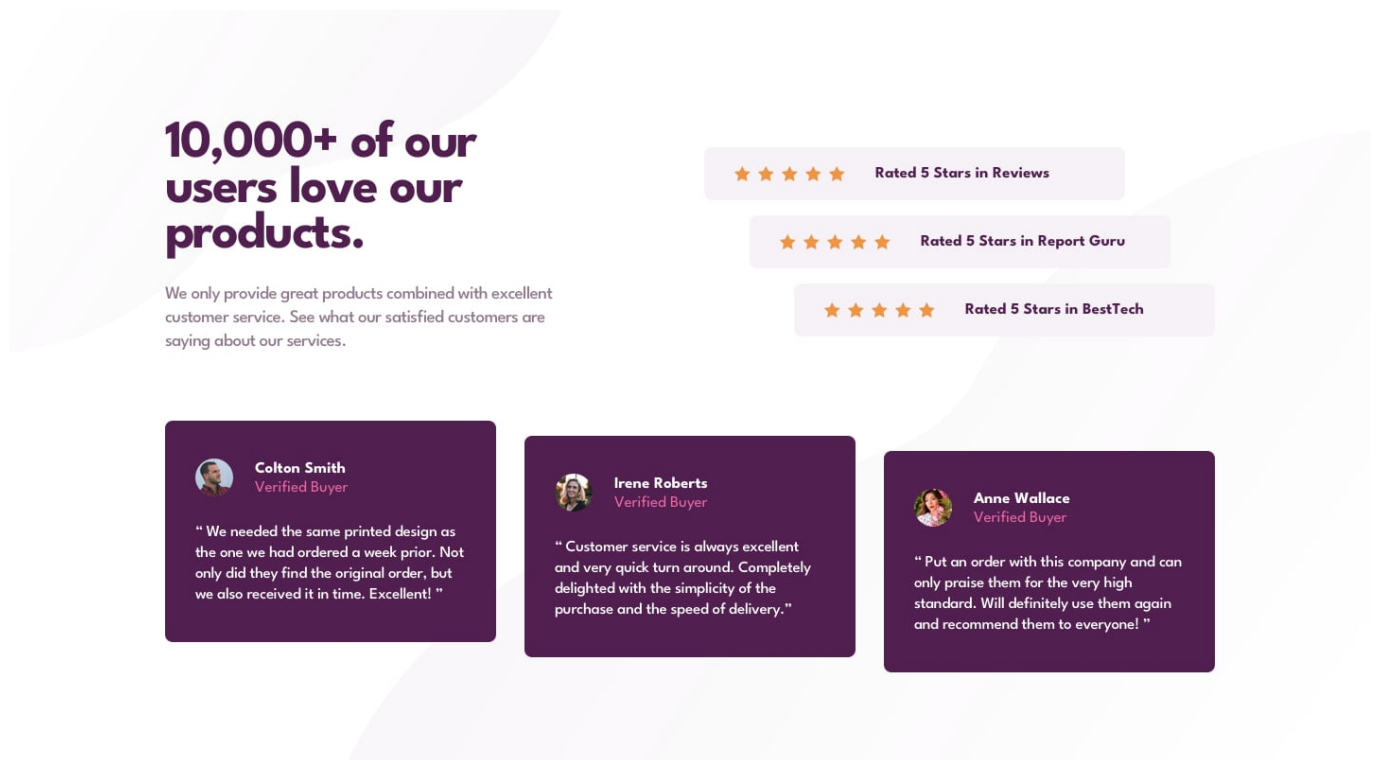

### The Brief

Due Date: **23th July, 2022 23:59:59**

Your challenge is to build out this social proof section and get it looking as close to the design as possible.

- You should use plain HTML and CSS. You might not need any JavaScript in this project.
- You should implement responsive design so that your design looks good in different devices like Desktops, Tablets, and Mobile Phones.

Below is an image of the final design on Desktop. Please see the other designs in the **design** folder included along with this file.

Hint: You might need CSS features like **Flexbox**, **Positioning** and **Backgrounds** for your main layout components.
